New ASPA Partner!!!

-Nothing But Network Solutions -

Nothing But Network Solutions specializes in finding voice and internet solutions that will meet and enhance your business needs. They have also educated themselves with the changes regarding EMR applications in the medical field and understand what is required from a service level to support those applications.

Their goal is to make sure you have the best pricing available for you voice and internet solutions without compromising service.

The benefits to working with them:

- *If you already have existing voice and internet services, they can do a cost comparison, comparing what you currently have to what is available on the market.
- *They familiarize themselves with your business needs and do the work to find the solutions that fit those needs and your budget, taking the hassle of "shopping around" away from you.
- *They manage the entire process for you from getting you the required order documents, initiating the order and coordinating the installation process with your phone and IT people.
- *After the service installation, they remain your one point of contact. They work directly with the service provider to facilitate any adds, moves or changes to your services. In addition, they also support you with any issues that may arise with the service provider, including billing issues or service issues.

SERVICES PROVIDED AT NO COST TO YOU
